(57) Abstract:

PURPOSE: To expand plural compressed images by one image expansion arithmetic unit and to simultaneously display them without providing the image expansion arithmetic units of the same number as plural pictures expanding plural compressed images in a device.

CONSTITUTION: Plural compressed image data (a) to (c) are expanded in time division in frame by the image expansion arithmetic unit 11, and plural decoded image data A to C obtained as a result are stored in plural storage areas 13A to 13C of a frame memory 13 respectively. Then, the decoded image data A to C are read out from the frame memory 13, and are outputted to a monitor 6 to be displayed simultaneously.
